

# NOMAD COIN WHITEPAPER

Decentralized Social Token for Digital  
Nomads

November 4 2021

## Disclaimer

<https://www.thenomadcoin.com/>

The purpose of this white paper is for information only and to present NOMAD Token to holders, cryptocurrency exchanges, and other interested parties. The information provided may not be exhaustive and does not in any way imply any elements of a contractual relationship. Its sole purpose is to provide relevant and reasonable information.

## Introduction

The Digital Nomad token (NOMAD) is a social media-driven decentralized cryptocurrency with a fixed supply of 100,000 tokens that was initially launched on August 1 2021 at \$.10 and reached a peak \$4 Million Market Cap. It is currently listed at [\\$1.04 as of Nov 4 2021 per coinranking.com](#). The token was launched by Canadian co-founders [Greg Hung](#) and Terry Masson on the Ethereum blockchain from Vancouver, Canada. We migrated the about 20% of our tokens to the Binance Smart Chain (BSC) on Oct 2021 to offer a cheaper and faster purchasing experience for future token holders. The NOMAD token was co-launched in Canada at the same time as INCH token, with different tokenomics as an educational experiment to see what token holders would value more. Both tokens have their roots in cryptocurrency education and knowledge sharing.

# Full Transparency & No Rug Pull Guarantee

A unique element of the NOMAD token is a fully transparent education and community driven cryptocurrency project. The co-founders live streamed in person almost every aspect of the token's journey from launch, liquidity pool creation, token lock up, and token migration to the binance smart chain. As a commitment to our holders in Sep 2021 [both co-founders locked their 10% share of NOMAD coins](#) in a trusted secure 3rd party until Jan 1 2022.

## Vision

The Digital Nomad and Remote Work lifestyle and community has grown in the past 5-6 years as Internet platforms and technology have evolved. Digital Nomads 1.0 value time and location freedom as well as travel experiences and possess high specialised skills sets such as content creation, digital marketing, video editing, programming, and language translation to name a few. Mainstream office workers experienced location freedom during the Corona Virus Pandemic in 2021 with working from home becoming a norm. With country borders being closed for most of the pandemic many countries have targeted digital nomads to help boost their tourism and economy. We expect that the Digital Nomad and Remote Work Community to grow. Our vision is get our tokens in the hands of the community to help facilitate skillshare and services exchange amongst the existing nomad community and future aspiring nomads. The Nomad tokens could be used amongst the community to offer workshops in cryptocurrency or even bachata dancing. Other use cases could be imagined amongst the Digital Nomad community once all tokens have been distributed.

We are also developing Digital nomad illustrated characters as part of our non fungible token (NFT) that in the future could become playable characters or avatars in a metaverse or video game.

This vision is achieved through the project's strengths:

- Both Co-founders have a combined 16 years experience as Educators online and Offline. [Terry Masson](#) was previously a National Director & Instructor for a Canadian National Massage Business for 9 years . [Greg Hung](#) transitioned from a 13 year career in IT to Online Instruction in Content Creation and Cryptocurrency for the past 7 years.
- The co-founders are Digital Nomads themselves and have existing nomad networks in popular Digital Nomad Hubs in Thailand and Mexico
- Co-founders are actively involved in networking in Digital Nomad communities in numerous countries to use their skill sets to help increase exposure to the token
- Scheduled workshops with Digital Nomads to educate them on topics like NFT's & purchasing tokens on the decentralized exchange like pancake swap and uniswap
- Full transparency in our projects to help build trusts and confidence to grow this project for the long term
- The NOMAD token exists on the Ethereum & Binance Smart Chain (BSC) blockchain

The NOMAD token is the first Digital Nomad token and is at the forefront of crypto's third wave (the first being Bitcoin, the second being Ethereum/Dogecoin proof-of-work). NOMAD is fully

adapted to the future of the DeFi ecosystem leveraging next-gen Proof-of-Stake (PoS) technology across multiple blockchains.

**Versatile & Adaptable** – NOMAD Token is blockchain agnostic. While initially launched on Ethereum (as an ERC-20 token), it has already been ported to Binance Smart Chain with possible plans to migrate our tokens to Polygon, Cardano and Solana blockchains. This versatility is a key quality of NOMAD, allowing it to not only be accessible through more exchanges & markets & benefit from the strengths of each particular blockchain.

**An Innovative Canadian Project** - The NOMAD & INCH Ethereum based tokens being launched in Canada are a win for the country alongside other milestones in the Cryptocurrency world such as the first Bitcoin ATM in Vancouver Canada, and the first Bitcoin and Ethereum Exchange Traded Funds (ETF's). Our tokens are on the cutting edge being bridged to multiple blockchains and being integrated into Non Fungible Tokens (NFT). We hope to trailblaze the way for other Canadians to get involved in cryptocurrency through the education & knowledge we share.

**Transparent** – Unlike other cryptocurrencies that are shrouded in anonymity and lack of transparency, NOMAD token has 2 visible co-founders Greg Hung & Terry Masson from Canada.

**Community Driven** – Community is at the heart of the NOMAD Token: an ecosystem of digital nomads, remote workers, digital artists, marketers, entrepreneurs, and enthusiasts looking to collaborate and socialize. We have already engaged the online and offline community to help with our website, graphic design, workshops, and upcoming NFT collection. The core of the community is here for the long term.

**NFT-Ready** – NFT's have gained mass popularity in 2021 and nomad token co-founder Greg Hung has experience minting NFT's. He is working with a Dutch Digital Nomad Illustrator in Mexico to build an NOMAD NFT collection on platforms like Opensea. There are already plans in November 2021 to hold workshops to teach Digital Nomads to mint their own NFT's. The event will be NOMAD token access only providing an example of the use case of the tokens for education purposes and skillshare.

**A Passport or Souvenir** - Due to the scarcity of the token there may be a point where the tokens may all be purchased and the NOMAD tokens become a rare collector item or souvenir that increases in value.

---

## The Value of Social Tokens

### Social Tokens Will Disrupt Industries

Social is powerful and our tokens got inspiration from another social token called Million on Youtube. It is the only element that can drive exponential growth, seen in the rapid rise of social-media networks.

It is important to consider the NOMAD Token within the context of the current crypto market place. The CEO of RealVision and former Goldman Sachs executive Raoul Pal went on [TheDefiant podcast in July 2021](#) discussing this emerging sector in cryptocurrency.

"[I] took some macro bets on the future of where this is all going including communities and social tokens," Pal commented.

According to Pal, in the near future, businesses will soon be centering their efforts around communities. They will be driving their own value systems through social tokens, and benefitting from the network effects of those systems.

Pal also pointed out that the social tokens industry will move from a billion dollar business to a trillion dollar business over the next five or ten years. NOMAD Token is perfectly positioned to take advantage of this new movement.

## NOMAD ROADMAP

### Phase 1

- ✓ Setup website, graphics, and social media channels
- ✓ BSC Network Integration (bridged)
- ✓ Exchange Listings Coinranking.com
- ✓ Founder Token lockup at team.finance
- ✓ Collaborate with Off & Online Influencers to provide exposure

### Phase 2

- ✗ Collaborate on NOMAD NFT collection
- ✗ Provide Education on Buying Tokens for Beginners
- ✗ Migrate Tokens to Cardano ADA
- ✗ Launch On Polygon
- ✗ Exchange listings on Coingecko.com & Coinmarketcap.com
- ✗ Exchange listing on Crypto.com
- ✗ Exchange listing on Wealhsimple
- ✗ Exchange listing on Coinbase
- ✗ Accept payment in NOMAD tokens

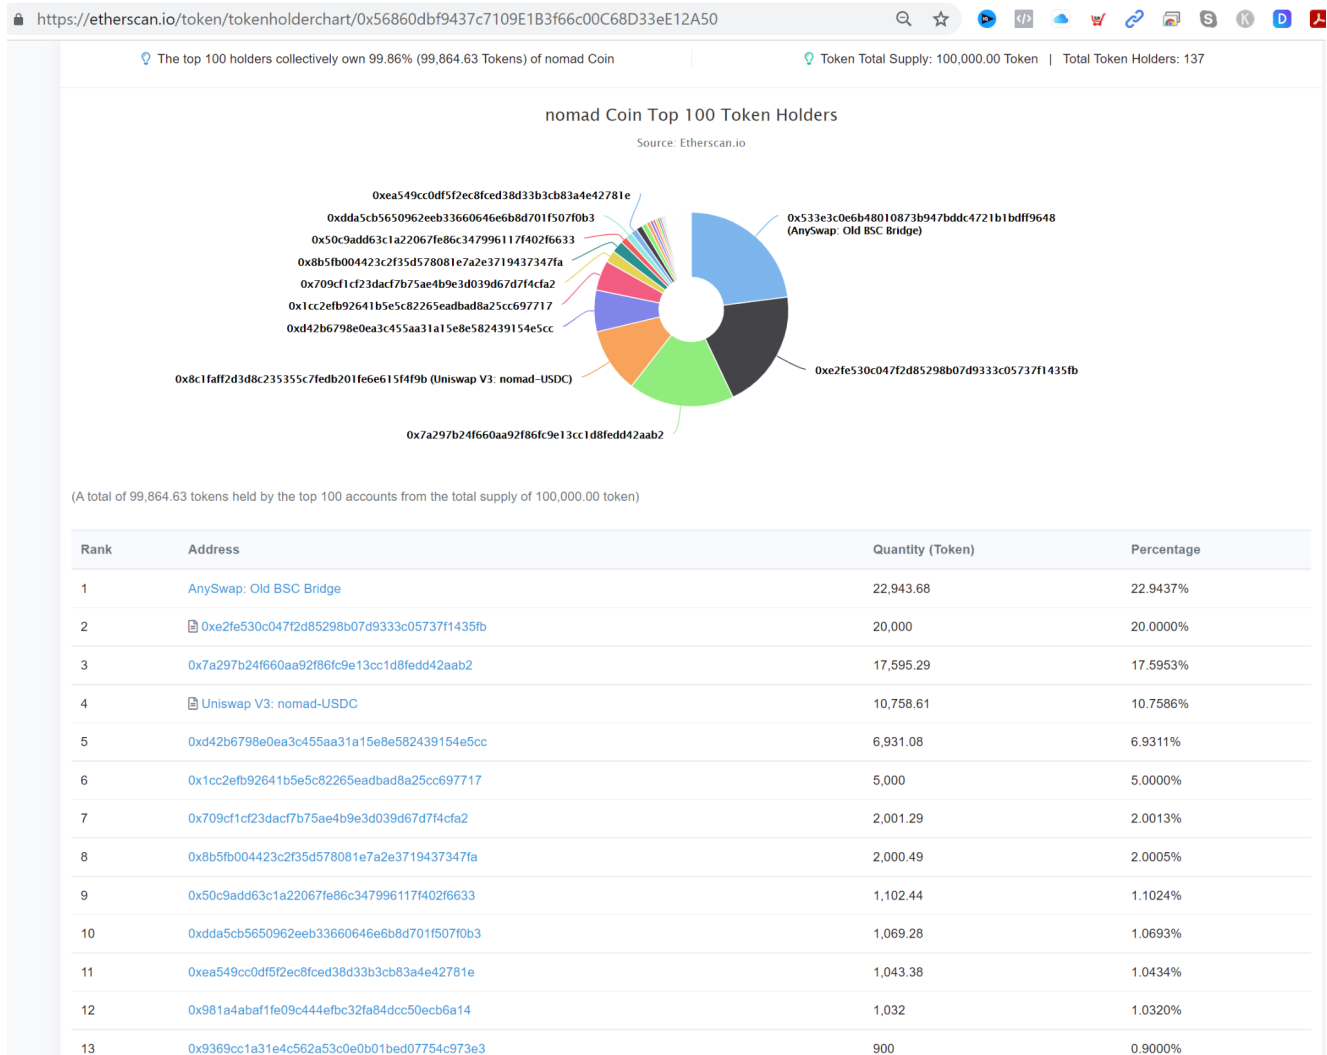

### Phase 3

- ⊗ NOMAD token 2.0 with more supply
- ⊗ NOMADSWAP
- ⊗ NOMAD playable Videogame or Metaverse using NOMAD NFT characters
- ⊗ Partnership with Celebrity Influencers
- ⊗ Collaboration with Fortune 500 Brands
- ⊗ 1 Billion Market Cap

## Tokenomics

NOMAD has a fixed supply of 100,000 tokens and the tokenomics are easy for beginners to understand the pricing relative to traditional currency. There are 330 holders for Nomad across Ethereum and Binance Smart Chains.

# Founders

## Terry Masson

Terry is a habitual entrepreneur and avid investor. He got his start at the age of 21 running his own investment club which made him enough money to buy a used Honda Civic. He went on to create and grow several businesses from wholesaling razor blades, to having an eBay store, to currently running a nation wide massage training school and clinic.

Terry's passion is helping people, whether it be freeing them of their pains through massage or improving their personal finances. He is a born leader and educator with the dedication to onboarding millions of people safely into the cryptosphere, so they can create generational wealth for their families, just like Terry has.
